

Product Data Specification & Catalog

Company: Deshi Biponon (Pvt.) Ltd.

Document Version: 1.0

Date of Generation: October 20, 2025

1.0 Introduction

This document provides a comprehensive specification of the product data for the Deshi Biponon e-commerce platform. It details the data schema used for product management and provides a complete listing of all currently active products. The information herein is sourced from our primary product database and is intended for use by our development, marketing, and sales teams.

Each product entry includes its primary description, metadata for search engine optimization (SEO), and internal identifiers for database management. Additionally, supplementary operational data such as suggested pricing, stock levels, and supplier information has been included to provide a complete operational overview.

2.0 Data Schema Definition
